

LAKE ACCESS AND INFRASTRUCTURE

- Launching ramps need to be longer and flatter to accommodate larger boats at lower water levels. Some ramps are too steep to launch large boats.
- Mark courtesy docks as "No Swimming/Fishing".
- Improve and add infrastructure (ramps, courtesy docks, parking lots, conference centers, restrooms, pavilions, and tournament weigh-in areas.).
- Courtesy docks need to have more bumper pads to prevent damage to boats.
- Courtesy docks need to be farther from ramps to prevent congestion and facilitate better use.
- Need additional parking, ramps, and facilities (inadequate during fishing tournaments).
- Marinas & resorts need to upgrade/perform housekeeping to attract more business.
- Look for opportunities for agencies to partner with local governments, civic groups, or businesses to establish access or recreation areas.
- Extend walkway of private docks to allow for extended use into the fall and winter months.
- More bank fishing opportunities.
